Case log summary

For credentialing and privileges. Anesthesiologists and CRNAs.

NAME _____ CREDENTIALS _____

FACILITY _____ TOTAL CASES _____

PERIOD: FROM _____ TO _____

ANESTHESIA

A case can count in more than one row

General	
MAC	
Spinal	
Epidural	
CSE	
Regional (nerve block as the anesthetic)	

ASA PHYSICAL STATUS

ASA 1	
ASA 2	
ASA 3	
ASA 4	
ASA 5 and 6	
Emergencies (ASA E)	

PATIENT AGE

Under 3 months	
3 to 11 months	
1 to 2 years	
3 to 11 years	
12 to 17 years	
18 to 64 years	
65 and over	

HOW YOU WORKED

Use the set that fits you

Solo or Independent	
Directing or Medically directed	
Supervising or Medically supervised	

TECHNIQUES AND PROCEDURES

What you did yourself

Spinal or CSE	
Epidural or CSE	
Nerve blocks	
Arterial lines	
Central lines	
PA catheters	
TEE	

YOUR FORM'S OWN CATEGORIES

In its words

Every hospital writes its own form. Copy what it counts here: cardiac, obstetric, pediatric, and so on.

I attest that the counts above are an accurate record of anesthesia care I personally provided at the facility named above during this period. Counts reflect what I recorded for each case.

Signature _____ Date _____

Department chair or medical staff office, only if your form asks for it: signature and printed name _____ Date _____

No patient names, record numbers or birthdays. A credentialing log is counts and dates, not charts.

Case log

One line a case. Print this page as many times as you need.

How you worked. Anesthesiologists: solo, directing or supervising. CRNAs: independent, medically directed or medically supervised.

Age. A number of years is enough. For children, the bands are under 3 months, 3 to 11 months, 1 to 2, 3 to 11 and 12 to 17 years.

Leave out patient names, record numbers and birthdays. The spreadsheet at anesto.app/tools/case-log-template adds the counts up for you.
